USIQUÍMICA TIMELINE

USIQUÍMICA TIMELINE

OUR IDENTITY

With more than 78 years of activities, Usiquimica has evolved to become one of the most respected companies in the chemical industry. Our success is a result of the strength of innovation and perseverance, of our achievements and team spirit.

Usiquimica focuses on having a strong presence in the markets in which operates, always standing out by a constant search for improvement through modern operational processes and an efficient logistics chain.

Usiquimica has the most modern Ammonium Hydroxide production plant in Brazil. Beside that, our company became one of the main players in the Ad Blue(DEF) market. Based on a business diversification process Usiquimica Group decided to invest in Lubricants, with the Valvoline™ Partnership. Usiquimica became the official licensed partner in Brazil being responsible for whole operation in Brazil (Marketing, production and distribution).

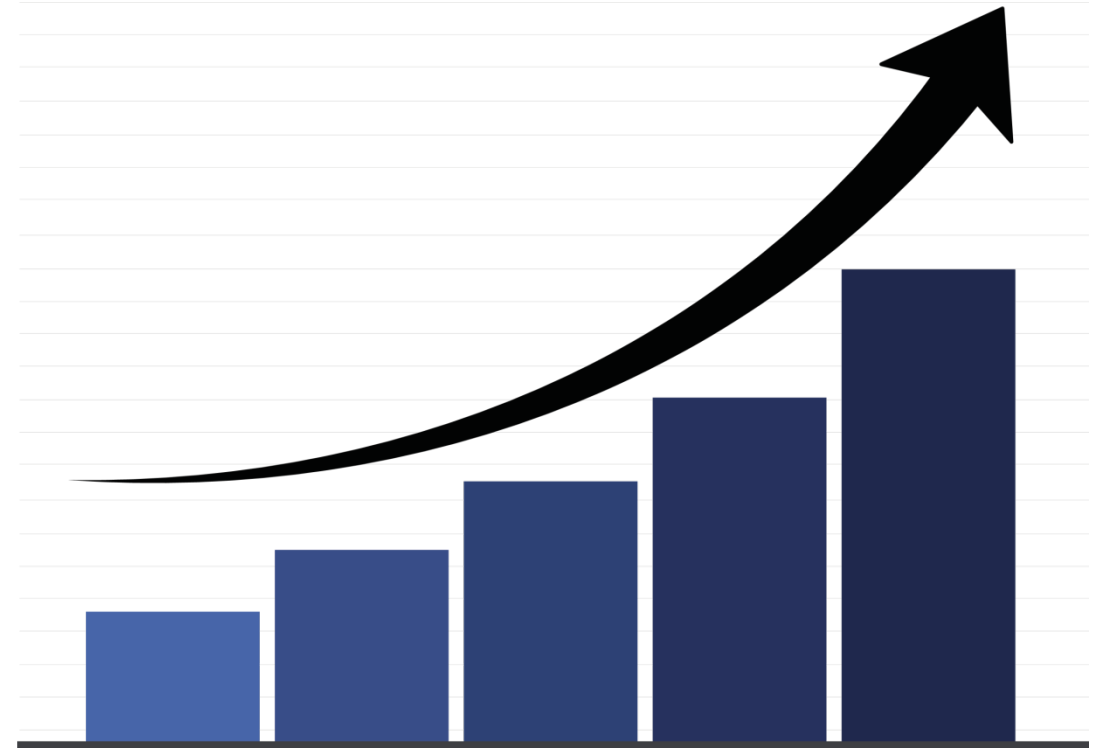

FINANCIAL PERFORMANCE

Usiquimica growth was 23% CAGR in the last 5 years. This growth is based on a continuous search for opportunities and new business development

Usiquimica is a company with no revealing debts. All investments are made with your own cash generation

Usiquimica seeks businesses with healthy margins and opportunities that can improve shareholder results

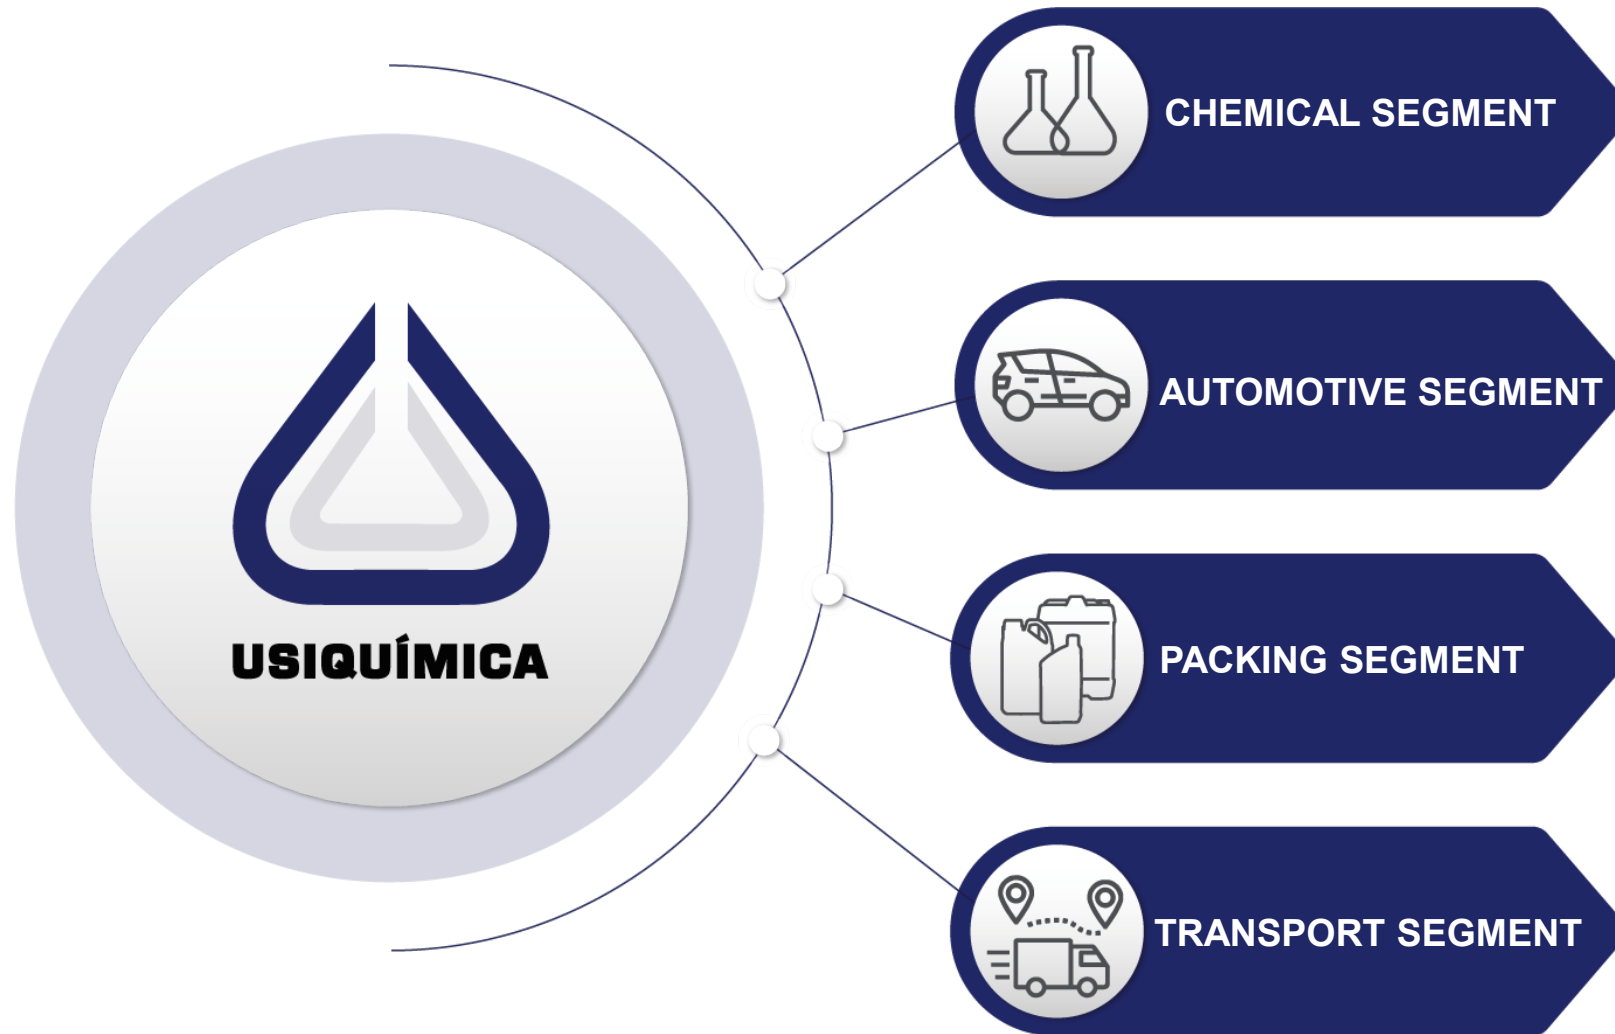

The company focuses on continuous cost reduction to ensure competitive margins

PARTNERS

BUSINESS SEGMENT

AUTOMOTIVE SEGMENT

Valvoline™, one of the world's largest producers and retailers in the segment of high-quality automotive, commercial and industrial lubricants, announced an exclusive partnership with Usiquímica, a major manufacturer and distributor of high value-added chemicals, to manufacture, distribute and manage activities related to Valvoline brand products in Brazil. The new partnership adds Valvoline's superior quality lubricants, its heritage and worldwide know-how to Usiquímica robust manufacturing, operations, sales, management and local presence. Valvoline's objective is to offer high quality products with superior service standards in order to offer its customers in Brazil better options and attractive prices. For the Automotive Segment, Usiquimica is one of the biggest Ad Blue (DEF) manufacturer in Brazil. We stand out for the quality of our product, service level and product availability.

AD BLUE (DEF)

LUBRIFICANTS

COOLANTS

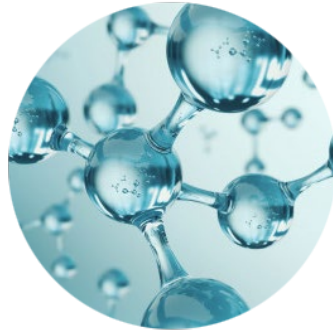

CHEMICAL SEGMENT

Nitric Acid

Usiquímica has been operating in the distribution of Nitric Acid since its foundation in 1943, both bottled and in bulk, with a high-level operational and logistical structure to serve the entire market.

Hydrofluoric Acid

It is a 100% imported product and Usiquímica stands out as the largest importer of this material in Latin America. Therefore, we have a product of excellent quality with service throughout Brazil.

Ammonia and Derivatives

Usiquímica is the largest Ammonia Hydroxide manufacturer in Brazil and the biggest Ammonia Anhydrous distributor.

Sulfuric Acid

Usiquímica is a Sulfuric Acid distributor with a high service level to the market supplying mainly the sugar mill and mining market

Soda Chlorine

Usiquímica plays an important role in such market as a traditional distributor.

Urea and Solutions

Usiquímica is an important Urea solution manufacturer for industrial NOx emissions treatment.

PACKING SEGMENT

Praxis was founded in 2013 for the production of blown plastic packaging for consumption by Usiquimica and subsequently to the consumer marketing.

It is located in Guarulhos (SP) in building 1,000 m2 fully structured and distributed in a manufacturing area, storage of raw materials and packaging, shipping, quality control, maintenance and office.

Our processability with low level of scrap is guaranteed by the highest quality equipment that is our utilities, in-line workstations composed of aligned bottleneck pins, internal bomb coolers, in-line scale, hole tester, labeler and packers with bagging automatic and induction sealing in the closing of the bags, emphasizing that the in-line test cover 100% of our packaging, wich guarantees us na excellent quality standard with a minimum amount of operational labor.

TRANSPORT SEGMENT

BR Bulk started its operation in 2012 with the aim of offering logistic solutions for Chemical Products, transport and storage operations for Usiquímica and its partners.

Currently, the main BR Bulk operation is DEF management and transport for Usiquímica customers.
